

Cockpit Inspection

- Check the backup and sideview cameras.
- Adjust the mirrors and make sure they are functioning properly.
- Make sure the instrumentation and gauges are working.
- Check the fuel level.
- Take a close look at the windshield for any signs of cracks or chips.
- Test the sunshade operation.
- Run the windshield wipers/washer; check the condition of the wipers and replace if necessary.
- Turn on the headlights at night to check alignment.
- Road test the motorhome before loading it for a trip.
